

## To All Educational Institutions for Civil Engineering and Construction Management

For the 14<sup>th</sup> time, PERI is organizing an international construction exercise that is targeted at all educational institutions that offer construction-related courses. This exercise covers many important aspects of the construction business. The goal is to deepen the knowledge of these topics using hands-on tasks especially in the work preparation phase and formwork technology. For realizing the exercise, **BIM technology** can be used.

**Entries that comply with the rules will compete for the award of the**

## PERI - Prize

**The total prize fund is more than € 20.000!**

The contributors of the five best studies will be invited to the final qualification that takes place in Weissenhorn, Germany in November 2023. The students present their work to the auditorium. The jury will be comprised of renowned construction specialists. Who will then decide on the final placings during the 3-day event, which will also include an organized evening program for all participants.

The exercise can be executed in groups up to 5 people. The submissions, to be completed in English or German, are limited to 100 pages (including plans and layouts). Submitted entries will not be returned as they become the property of PERI. PERI receives the publication rights by mentioning the name of the author. Last date of entry is **31 July 2023** (date of postmark). The judges decision is final!

More information about the tasks is available on the internet:
